Status Finished

Started Tuesday, 6 October 2026, 9:05 AM

Completed Tuesday, 6 October 2026, 9:05 AM

Duration 10 secs

Marks 9.00/9.00

Grade 10.00 out of 10.00 (100%)

Question 1

Correct

Mark 1.00 out of 1.00

The component shown in the figure is a/an _____.

- ☐ a. motor protection circuit breaker (MPCB)
- ☒ b. switch fuse ✓
- ☐ c. thermal overload relay
- ☐ d. contactor

Question 2

Correct

Mark 1.00 out of 1.00

The component shown in the figure is a/an _____.

- ☐ a. motor protection circuit breaker (MPCB)
- ☒ b. contactor ✓
- ☐ c. 3-phase motor
- ☐ d. thermal overload relay

Question 3

Correct

Mark 1.00 out of 1.00

The component shown in the figure is a/an _____.

- ☐ a. 3-phase motor
- ☒ b. thermal overload relay ✓
- ☐ c. safety switch
- ☐ d. motor protection circuit breaker (MPCB)

Question 4

Correct

Mark 1.00 out of 1.00

The component shown in the figure is a/an _____.

- ☒ a. motor protection circuit breaker (MPCB) ✓
- ☐ b. 3-phase motor
- ☐ c. motor protection circuit breaker (MPCB)
- ☐ d. safety switch

Question 5

Correct

Mark 1.00 out of 1.00

The component shown in the figure is a/an _____.

- ☐ a. residual current device (RCD)
- ☐ b. safety switch
- ☐ c. miniature circuit breaker (MCB)
- ☒ d. 3-vaihemoottori ✓

Question 6

Correct

Mark 1.00 out of 1.00

The component shown in the figure is a/an _____.

- ☐ a. residual current device
- ☐ b. miniature circuit breaker (MCB)
- ☐ c. switch fuse
- ☒ d. safety switch ✓

Question 7

Correct

Mark 1.00 out of 1.00

The component shown in the figure is a/an _____.

- ☐ a. switch fuse
- ☒ b. miniature circuit breaker (MCB) ✓
- ☐ c. residual current device (RCD)
- ☐ d. contactor

Question 8

Correct

Mark 1.00 out of 1.00

The component shown in the figure is a/an _____.

- ☐ a. contactor
- ☐ b. switch fuse
- ☐ c. thermal overload relay
- ☒ d. residual current device (RCD) ✓

Question 9

Correct

Mark 1.00 out of 1.00

Match each electrical component to its correct description.

An electrically controlled switching device used to start and stop electrical loads such as motors.

Contactor

An automatically operated switch that protects electrical circuits from overloads and short circuits.

Miniature circuit breaker (MCB)

A protective device that disconnects the circuit when a leakage current to earth is detected.

Residual current device (RCD)

A protective device that disconnects a motor when excessive current causes overheating.

Thermal overload relay

A circuit breaker designed specifically to protect electric motors against overloads and short circuits.

Motor protection circuit breaker (MPCB)

A device that combines a switch and fuses to provide isolation and overcurrent protection.

Switch fuse

A switch used to isolate electrical equipment for safe maintenance and operation.

Safety switch

An electric motor powered by a three-phase AC supply.

Three-phase motor
